

Zymark Production Robot BIPI

Client:

Boehringer Ingelheim
Pharmaceuticals Inc.

Location:

Danbury, CT

Project:

The Zymark installation was the prototype lab for the \$20 million Lead Discovery Technology Building. The Zymark unit performs automated drug development and assay preparation.

The room design involved close coordination with the automated process development team. The room needs included clean room grade HVAC, process gas distribution, clean power distribution, multi level lighting, and close temperature control.
